UN Assistant Secretary-General,  
Executive Director, UNITAR

# Human Health and Climate Change

## Course Goals and Outline

This specialized module has been developed through the One UN Climate Change Learning Partnership (UN CC:Learn), in close collaboration with the World Health Organization (WHO). UN CC:Learn is an initiative of more than 30 multilateral organizations supporting results-oriented and sustainable learning on climate change. WHO seeks to publish and disseminate scientifically rigorous public health information of international significance that enables policy-makers, researchers and practitioners to be more effective. At the end of the e-course, participants should be able to:

- Explain how weather, climate variability and climate change can affect human health.
- Describe the health benefits of mitigation and adaptation policies and measures in health and related sectors.
- Identify a variety of tools to assess and integrate health within climate change policies and strategies, and integrate climate change within health policies and strategies.
- Provide examples of how countries are responding to the health challenges posed by climate change, including taking advantage of the opportunities.

The modules of the e-course are:

1. Climate Change and Human Health
2. Adaptation: Building Health Systems' Resilience to Climate Change
3. The Mutual Benefits of Climate Change Mitigation and Health Policies

The estimated learning time is 2 hours for completion.

## Completion Requirements

The certificate of completion is awarded to participants who successfully complete the e-course by achieving a minimum grade of 70% on the knowledge assessment.
